

Sensory Mechanisms in Bacteria

Molecular Aspects of Signal Recognition

Edited by: Stephen Spiro¹ and Ray Dixon²

¹ Department of Molecular and Cell Biology, University of Texas at Dallas, Richardson, Texas 75083-0688, USA

² Department of Molecular Microbiology, John Innes Centre, Norwich Research Park, Norwich, NR4 7UH, UK

c. 280 pp, September 2010

ISBN 978-1-904455-69-1, \$310/£159

Bacteria have evolved extraordinary abilities to regulate aspects of their behaviour (such as gene expression) in response to signals in the intracellular and extracellular environment. Key to this are the diverse macromolecules (proteins or RNA) that sense change through direct interactions with chemical or physical stimuli. In recent years there have been tremendous advances in our understanding of the structure and function of these signal receptors, and of how interaction with the signal triggers changes in their activity and downstream events. For some systems this understanding extends to the atomic level.

In this unique book, an international team of experts reviews a selection of important model systems, providing a timely snapshot of the current state of research in the field. The book opens with an introductory chapter that reviews the diversity of signal recognition mechanisms, illustrating the breadth of the field. Subsequent chapters include descriptions of the sensing of ligands (α -ketoglutarate, adenylate energy charge, glutamine and xenobiotic compounds), chemoreceptors, iron-sulfur cluster-based sensors, metal-dependent and metal-responsive sensors, thiol-based sensors, and PDZ domains as sensors of other proteins. This book provides essential reading for everyone with an interest in sensory mechanisms, regulatory networks and responses to environmental stress in bacteria.

Table of Contents

- Preface. • Chapter 1: Natural history of sensor domains in bacterial signaling systems. *L. Aravind, Lakshminarayan M. Iyer and Vivek Anantharaman* • Chapter 2: Sensing ligands by periplasmic sensing histidine kinases with sensory PAS domains. *H. Kneuper, P. Scheu, M. Etzkorn, M. Sevana, P. Dünnwald, S. Becker, M. Baldus, C. Griesinger, G. Uden* • Chapter 3: Sensation of α -ketoglutarate, adenylate energy charge, and glutamine, and signal integration by the nitrogen assimilation control system of *Escherichia coli*. *Alexander J. Ninfa and Peng Jiang* • Chapter 4: Sensing xenobiotic compounds: Lessons from bacteria that face pollutants in the environment. *Víctor de Lorenzo, Rafael Silva-Rocha, Guillermo Carbajosa, Teca C. Galvão and Ildefonso Cases* • Chapter 5: Bacterial chemoreceptors as membrane-spanning allosteric enzymes. *Michael D. Manson* • Chapter 6: Iron-sulfur cluster-based sensors. *Jeffrey Green, Jason C. Crack, Adrian J. Jervis, David P. Dibden, Laura J. Smith, Andrew J. Thomson and Nick E. Le Brun* • Chapter 7: Metal-dependent and metal-responsive regulatory systems. *John D. Helmann* • Chapter 8: Thiol-based sensory factors. *Haike Antelmann and Peter Zuber* • Chapter 9: PDZ domains as sensors of other proteins. *Rebecca Kirk and Tim Clausen*

Sensory Mechanisms in Bacteria

Molecular Aspects of Signal Recognition

Edited by: **Stephen Spiro and Ray Dixon**
c. 280 pp., September 2010

ISBN: 978-1-904455-69-1 \$310 / £159

An international team of experts reviews a selection of important model systems, providing a timely snapshot of the current state of research in the field.

Borrelia

Molecular Biology, Host Interaction and Pathogenesis

Edited by: **D. Scott Samuels and Justin D. Radolf**

xii + 548 pp., March 2010

ISBN: 978-1-904455-58-5 \$310 / £159

Written by renowned scientists in the field who have made seminal contributions to the field, this book is a comprehensive guide to the pathogenic *Borrelia*.

Nanotechnology in Water Treatment Applications

Edited by: **T.E. Cloete, M. de Kwaadsteniet, M. Botes and J.M. López-Romero**
c. 200 pp., June 2010

ISBN: 978-1-904455-66-0 \$310 / £159

State-of-the-art research and development in nanomaterials and their application in water treatment, purification and disinfection. Nanotechnology applications in microbiology and water treatment.

Iron Uptake and Homeostasis in Microorganisms

Edited by: **Pierre Cornelis and Simon C. Andrews**

c. 300 pp., June 2010

ISBN: 978-1-904455-65-3 \$310 / £159

A comprehensive collection of reviews on iron uptake and metabolism in a wide range of microorganisms. An expert and timely summary with a focus on molecular and genetic aspects.

Anaerobic Parasitic Protozoa

Genomics and Molecular Biology

Edited by: **C.G. Clark, P.J. Johnson, R.D. Adam**

x + 222 pp., March 2010

ISBN: 978-1-904455-61-5 \$310 / £159

Internationally acclaimed researchers critically review the most important aspects of research on anaerobic parasitic protozoa.

Metagenomics

Theory, Methods and Applications

Edited by: **Diana Marco**

x + 212 pp., January 2010

ISBN: 978-1-904455-54-7 \$310 / £159

Essential reading for all researchers performing metagenomics studies. Highly recommended.

Microbial Population Genetics

Edited by: **Jianping Xu**

viii + 214 pp., March 2010

ISBN: 978-1-904455-59-2 \$310 / £159

Details the major current advances in microbial population genetics and genomics.

Other Books of Interest

Environmental Microbiology:

Current Technol. & Water Applications

Edited by: **Keya Sen and Nicholas J. Ashbolt**
c. 310 pp., September 2010

ISBN: 978-1-904455-70-7 \$310 / £159

PCR Troubleshooting and Optimization

Edited by: **S. Kennedy and N. Oswald**
September 2010

ISBN: 978-1-904455-72-1

Insect Virology

Edited by: **S. Asgari and K. N. Johnson**
c. 447 pp., September 2010

ISBN: 978-1-904455-71-4 \$310 / £159

Molecular Phylogeny of Microorganisms

Edited by: **Aharon Oren and R. Thane Papke**
c. 225 pp., July 2010

ISBN: 978-1-904455-67-7 \$310 / £159

Lentiviruses and Macrophages:

Molecular and Cellular Interactions

Edited by: **Moira Desport**
xii + 346 pp., March 2010

ISBN: 978-1-904455-60-8 \$310 / £159

Bifidobacteria:

Genomics and Molecular Aspects

Edited by: **B. Mayo and D. van Sinderen**
c. 265 pp., August 2010

ISBN: 978-1-904455-68-4 \$310 / £159

Environmental Molecular Microbiology

Edited by: **Wen-Tso Liu and Janet K. Jansson**
viii + 232 pp., January 2010

ISBN: 978-1-904455-52-3 \$310 / £159

ABC Transporters in Microorganisms

Edited by: **Alicia Ponte-Sucre**
xii + 260 pp., August 2009

ISBN: 978-1-904455-49-3 \$310 / £150

Pili and Flagella:

Current Research and Future Trends

Edited by: **Ken Jarrell**
x + 238 pp., August 2009

ISBN: 978-1-904455-48-6 \$310 / £150

Bacterial Polysaccharides:

Current Research and Future Trends

Edited by: **Matthias Ullrich**
xii + 358 pp., June 2009

ISBN: 978-1-904455-45-5 \$310 / £150

RNA Interference and Viruses:

Current Innovations and Future Trends

Edited by: **Miguel Angel Martínez**
x + 252 pp., February 2010

ISBN: 978-1-904455-56-1 \$310 / £159

Lab-on-a-Chip Technology

Edited by: **K. E. Herold and A. Rasooly**

Vol 1: Fabrication and Microfluidics

ISBN: 978-1-904455-46-2 \$310 / £150

Vol 2: Biomolecular Separation and Analysis

ISBN: 978-1-904455-47-9 \$310 / £150

Microbial Toxins:

Current Research and Future Trends

Edited by: **Thomas Proft**
viii + 192 pp., May 2009

ISBN: 978-1-904455-44-8 \$310 / £150

Acanthamoeba:

Biology and Pathogenesis

Author: **Naveed Khan**

viii + 290 pp., February 2009

ISBN: 978-1-904455-43-1 \$310 / £150

Bacterial Secreted Proteins:

Secretory Mechanisms and Role in Pathogenesis

Edited by: **Karl Wooldridge**

xii + 512 pp., April 2009

ISBN: 978-1-904455-42-4 \$310 / £150

Lactobacillus Molecular Biology: From Genomics to Probiotics

Edited by: **Åsa Ljungh and Torkel Wadström**
x + 206 pp., January 2009

ISBN: 978-1-904455-41-7 \$310 / £150

Mycobacterium:

Genomics and Molecular Biology

Edited by: **Tanya Parish and Amanda Brown**
viii + 214 pp., January 2009

ISBN: 978-1-904455-40-0 \$310 / £150

Real-Time PCR:

Current Technology and Applications

Edited by: **J Logan, K Edwards and N Saunders**
x + 284 pp., January 2009

ISBN: 978-1-904455-39-4 \$310 / £150
