Dear Professor

Microbes have evolved an impressive and diverse range of strategies to subvert the host immune system. These range from evasion of adaptive immune responses. A better understanding of the underlying mechanisms involved is clearly essential for the rational design of novel therapeutic agents and vaccines to treat and/or prevent infectious diseases. Another area of active research is the development of pharmacologically active agents.

In our new book on **Microbial Subversion of Immunity**, Prof Peter Lachmann and Prof Michael Oldstone have compiled a unique collection of critical and comprehensive reviews of the most important issues. Each chapter is independent and can be read in isolation, but as a whole the book provides an important resource providing a snapshot of the current research in microbial subversion of immunity. Containing over 1,700 references, this book is an essential resource book for researchers in the fields of microbiology, immunology, pharmacology and molecular medicine.

Should you wish to buy a copy you will find an order form on the reverse of this letter. Alternatively you should recommend the book for purchase by your library. A "Library Recommendation Form" is printed below. Please complete the form and hand it to your librarian or library representative.

For further information on this volume and other microbiology books please visit [www.caister.com](http://www.caister.com)

## TO THE LIBRARIAN

I would like to recommend the following book for purchase by the library. This book is very relevant to the work in our department and I consider it an essential book to have in the library.

**Title: Microbial Subversion of Immunity**    **Edited by: Lachmann and Oldstone**    **Publisher: Caister Academic Press**

**ISBN: 1-904455-05-0**    **Price: \$319 / £159**

Available from:

- ISBS, Inc., 920 NE 58th Avenue, Suite 300, Portland, OR 97213-3786, USA Tel: 503 287-3093; Fax: 503 280-8832 [www.isbs.com](http://www.isbs.com)
- Book Systems Plus, BSP Hse, Station Road, Linton, Cambs, CB1 6NW, UK Tel: 01223 894870; Fax: 01223 894871 [www.booksystemsplus.com](http://www.booksystemsplus.com)

## Two-Component Systems in Bacteria

Edited by: R Gross, D Beier  
c. 410 pp, August 2012

ISBN: 978-1-908230-08-9, \$360/£180

Latest research on structure-function analysis, sensing mechanisms, atypical two-component systems, stress responses, developmental processes, virulence and symbiosis.

## Foodborne & Waterborne Bacterial Pathogens

Epidemiology, Evolution and Molecular Biology

Edited by: SM Faruque  
c. 330 pp, July 2012

ISBN: 978-1-908230-06-5, \$319/£159

Review topics such as pathogenic properties, population genetics, virulence genes, evolution, drug resistance, epidemiology, detection, identification and control strategies.

## Yersinia

Systems Biology and Control

Edited by: E Carniel, BJ Hinnebusch  
c. 240 pp, July 2012

ISBN: 978-1-908230-05-8, \$319/£159

Leading *Yersinia* researchers review the hot topics in the systems biology and control of these important bacteria.

## Stress Response in Microbiology

Edited by: JM Requena  
c. 500 pp, June 2012

ISBN: 978-1-908230-04-1, \$360/£180

Expert authors from around the world summarise the current knowledge on microbial stress response and comprehensively review the recent findings that have greatly advanced the understanding of stress response systems.

## Bacterial Regulatory Networks

Edited by: AAM Filloux  
c. 400 pp, June 2012

ISBN: 978-1-908230-03-4, \$360/£180

Authoritative, up-to-date reviews of the current research and theories on regulatory networks in bacteria. Critical reviews written by the leading research scientists in the field.

## Systems Microbiology

Current Topics and Applications

Edited by: BD Robertson, BW Wren  
c. 200 pp, June 2012

ISBN: 978-1-908230-02-7, \$319/£159

Cutting-edge reviews by world-leading experts on the systems biology of microorganisms. Includes theoretical approaches, mathematical modelling, case studies on microbial species and the systems analysis of microbial phenomena.

## Quantitative Real-time PCR in Applied Microbiology

Edited by: M Fillion

c. 280 pp, May 2012

ISBN: 978-1-908230-01-0, \$319/£159

Aimed specifically at microbiologists, this volume describes and explains the most important aspects of current real-time quantitative PCR (qPCR) strategies, instrumentation and software.

## Bacterial Spores

Current Research and Applications

Edited by: E Abel-Santos

c. 300 pp, April 2012

ISBN: 978-1-908230-00-3, \$319/£159

Comprehensive, up-to-date reviews on the current state of our knowledge of bacterial endospores. Essential text for everyone involved in spore research, the expression of recombinant proteins and pathogen detection.

## Small DNA Tumour Viruses

Edited by: K Gaston

x + 324 pp, March 2012

ISBN: 978-1-904455-99-8, \$319/£159

Leading scientists from around the world review current hot-topics on small DNA tumour virus research providing a fascinating overview of their molecular biology and interactions with the host.

## Extremophiles

Microbiology and Biotechnology

Edited by: RP Anitori

xiv + 300 (colour figures) pp, January 2012

ISBN: 978-1-904455-98-1, \$319/£159

Current and topical areas of extremophile research. The latest insights into the mechanisms these fascinating organisms use to survive and the most recent and novel biotechnological uses of extremophiles.

## Bacillus

Cellular and Molecular Biology (2e)

Edited by: P Graumann

xii + 398 pp, February 2012

ISBN: 978-1-904455-97-4, \$360/£180

A valuable reference work providing a comprehensive and up-to-date analysis. Critical reviews on the most recent and topical research.

## Microbial Biofilms

Current Research and Applications

Edited by: G Lear, GD Lewis

x + 228 pp, February 2012

ISBN: 978-1-904455-96-7, \$319/£159

An up-to-date review of the latest scientific research on microbial communities and a discussion of future trends and growth areas in biofilm-related research.

## Bacterial Glycomics

Current Research, Technology and Applications

Edited by: CW Reid, SM Twine, AN Reid  
x + 270 pp, February 2012

ISBN: 978-1-904455-95-0, \$319/£159

Up-to-date overview of our current understanding of bacterial glycomes, the main analytical methods and recent and novel applications.

## Non-coding RNAs and Epigenetic Regulation of Gene Expression

Drivers of Natural Selection

Edited by: KV Morris

x + 216 pp, February 2012

ISBN: 978-1-904455-94-3, \$319/£159

An important and up-to-date overview of the modulation of gene transcription by non-coding RNAs. An essential reference book and a major information resource for those working in the area.

## Brucella

Molecular Microbiology and

Genomics

Edited by: I López-Goñi, D O'Callaghan  
x + 262 pp, February 2012

ISBN: 978-1-904455-93-6, \$319/£159

Highly acclaimed *Brucella* scientists comprehensively review the most important advances in the field. Topics include: genetic diversity, proteomic analysis, transcriptomic analysis, and much more.

## Molecular Virology and Control of Flaviviruses

Edited by: P-Y Shi

x + 358 pp, January 2012

ISBN: 978-1-904455-92-9, \$360/£180

An up-to-date and cutting-edge anthology from the leading experts in the flavivirus field. Essential reading for flavivirus researchers at the graduate level and beyond.

*"a valuable resource" (Doodys)*

## Bacterial Pathogenesis

Molecular and Cellular Mechanisms

Edited by: C Locht, M Simonet

x + 370 pp, January 2012

ISBN: 978-1-904455-91-2, \$360/£180

Distinguished scientists comprehensively describe the most relevant and up-to-date information on pathogenic features across the bacterial world.

*"useful to those in many areas of research" (Doodys)*
